

# Sanitizing Hands

IN 3 STEPS

Rudolph  
Supply

1

## Use enough.

An amount the size of a quarter will cover both hands completely.

2

## Cover all areas.

It's easy to miss the thumbs, fingertips, and between the fingers.

3

## Rub until dry.

It should take about 20 seconds of rubbing until your hands feel dry.

**Remember:** Be aware of what you touch next. Your hands are only sanitized until you touch the next contaminated surface.
